Subject: Dimock Sampling Scheduled for Next Week (Supplemental Round 1 and Round 2)

Cindy -

This afternoon we got the green light to start scheduling sampling for next week. We are still working out the details. However, I wanted to give you as much of a heads-up as possible for planning purposes (especially given the upcoming holiday weekend).

Supplemental Round 1

As a reminder, we expect sampling to conduct supplemental round 1 sampling at a total of 3 locations. As this time, we have scheduled 2 of the 3 homes for sampling. One is scheduled for the morning of Tues 5/22 and one for the morning of Wed 5/23. We are attempting to schedule the 3rd for Tues afternoon. I am assuming that samples will be shipped to the various labs at the end of each day (Tues and Wed). I will leave the details to Tech Law. However, I want to stress that our intent is to have all of the "round 1" samples shipped by end of the day on Wed for Thurs morning delivery. I think the only exception will be the shipment of the micro data - which I recall is same day delivery.

Round 2

We expect to conduct a second round of sampling (metals only) at 4 locations. At this time, we have 2 of the 4 homes scheduled for Wed and Thurs. Our hope is to complete all sampling by Thurs no later than 2 pm or so - with the last samples being shipped out Thurs night for delivery to Fort Meade Lab on Fri 5/25.

I hope this helps. Please let us know ASAP if you have any concerns with the general game plan in terms of delivery/acceptance of samples.

Thanks!!!!
